More

Previous Landscape

A Student's Perspective

- First interaction with SFU
- A collage of systems
- Cognitive Overhead
- Core principle of SFU Snap
 - Reduce cognitive effort
 - Free mental resources

Previous Landscape

- Existing web applications designed for the desktop (and maybe "mobile second")
- Variety of third-party mobile apps
 - Branding
 - Consistency
 - Security issues

CS Student Project

The Project & competition

- CMPT 275 – A milestone course
- Ancillary Services Sponsorship
- Summer placement for top designers/developers

CS Student Project

The Process

- Requirements Gathering
- Data Requirements
- Student Acceptance Testing

CS Student Project

The Outcome

- 75 students - 15 apps
- Demo to sponsors
- A myriad of features and implementations

CS Student Project

The Outcome

- A group of 7 students ready to consummate the project into SFU's first official app

Mobile Strategy @ SFU

- User are mobile
- They want access to information systems anytime, anywhere, and with any device they choose

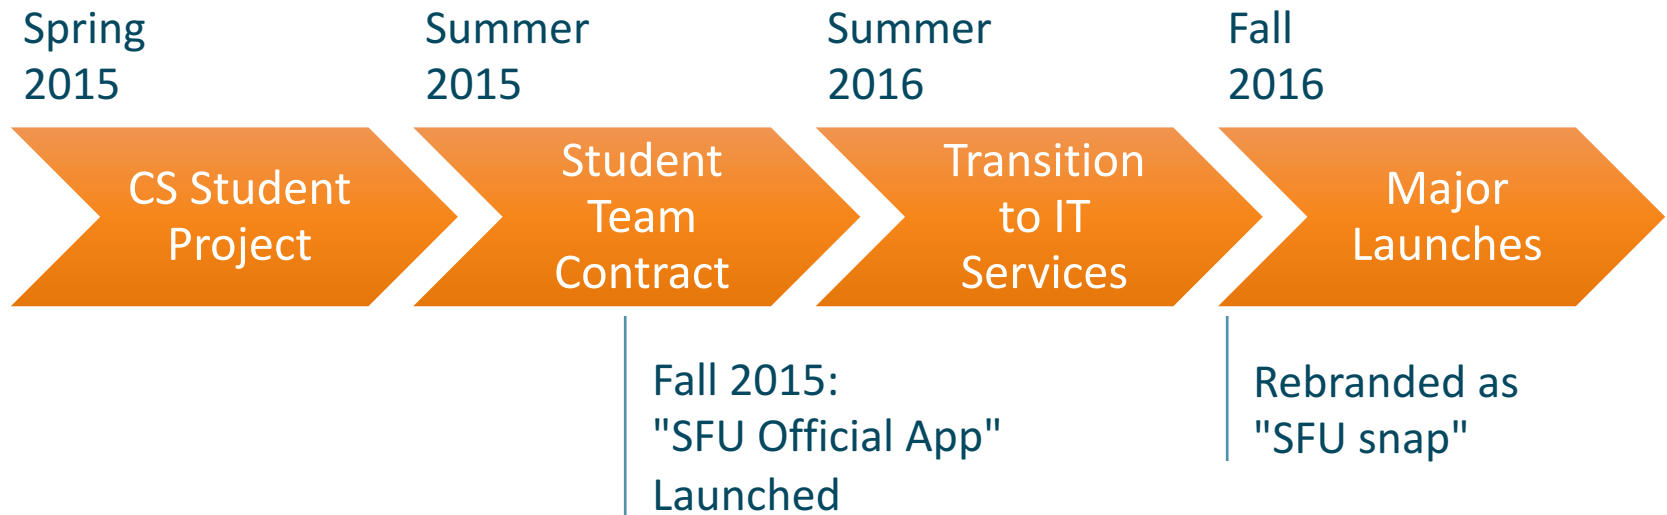

Mobile Strategy @ SFU

- Mobile First
- Provide a consistent and seamless mobile application experience
- Ensure a secure, private, and compliant mobile experience

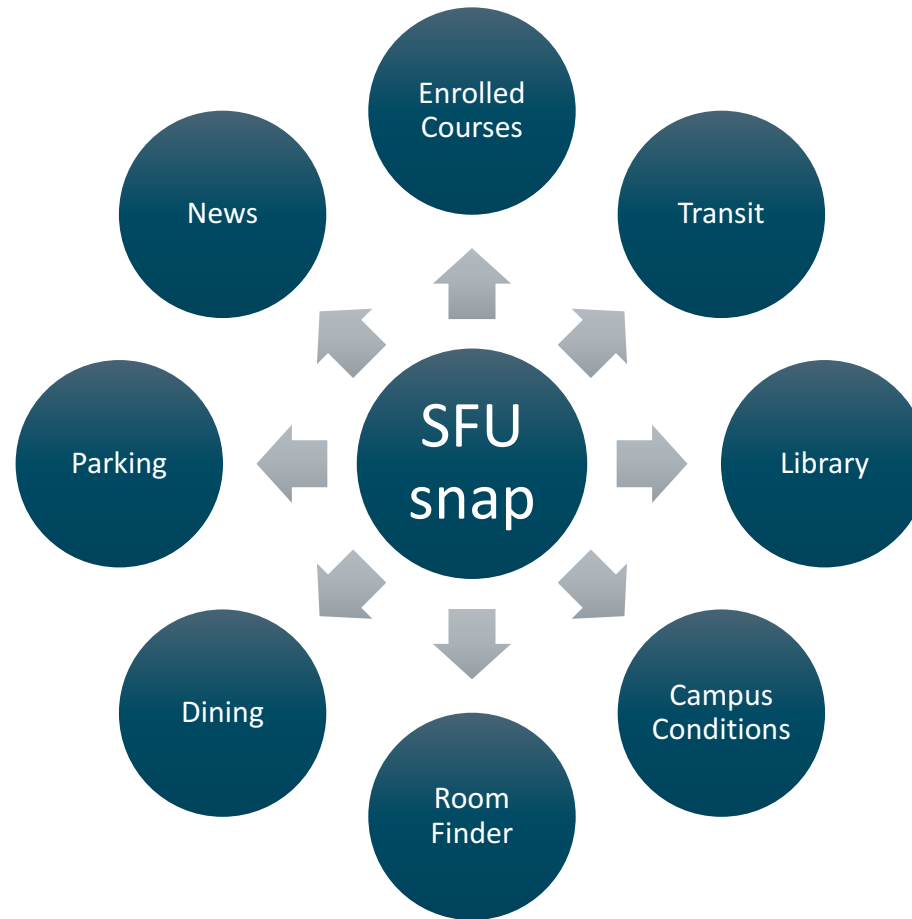

Collaboration

- Ancillary Services
 - Championed the app at the beginning
- Facilities Services
 - Room Finder data and mapping expertise
- IT Services
 - Workspace, resources, technical guidance

Evolution: Project to Product

App Features

Evolution Details

- Native Room Finder
 - Improved performance
 - Eliminated extra permission dialogs

Evolution Details

- User authentication
 - Enables personalized data
 - Persistent session without storing passwords
- Integration with Canvas
 - Unified view of events
 - Deep-linking to the Canvas mobile app
- User Acceptance Testing
 - Invited students to participate in testing

Total Lifetime Installs

Where we want to go?

- Add wayfinding to the Room Finder
- Enhance push notifications / message centre
- Integration with:
 - Enrollment and course management
 - Email
 - Parking
 - Athletics and recreation
- Student-driven development

Lessons Learned

- Importance of providing consistent data standards
- Commit resources needed to support development
- Mobile is a crucial part of student engagement
- Students demand mobile access of their data
- Launching with MVP to learn from users

Lessons Learned

- Collaboration across the University
- Putting the needs of audience first
- Think about Governance, but don't let it get in the way

Build vs Buy?

- Building the app was right for us. But is it right for you?
- One size does not fit all
- App as a platform for evolution
- Treat mobile as a strategic asset of the university not as a cost centre

Questions and Discussions
