

# Shared services for digital preservation

A library perspective

Corey Davis

Digital Preservation Network Manager, Council of Prairie and Pacific University Libraries (COPPUL)  
Systems Librarian, University of Victoria

BCNET 2017, Vancouver, BC  
Wednesday, April 26, 4:00pm-5:00pm

# Council of Prairie and Pacific University Libraries

- Represents 22 university libraries in Western Canada
- “...leverage collective expertise, resources, and influence, increasing capacity and infrastructure, to enhance learning, teaching, student experiences, and research at our institutions.”
- Digital preservation is one of three key strategic priorities moving forward

# Digital dark age?

- “Much of our global cultural heritage, and our own individual and social imprint, is at serious risk of disappearing.”
  - Richard S. Whitt, Corporate Director for Strategic Initiatives at Google

# Benign neglect does not work!

- “In the past, a do nothing approach, frequently characterised as ‘benign neglect’, has often been enough to ensure the survival and usability of physical data. However, computer systems and software applications change so rapidly there is no guarantee that existing data sources will be accessible and useable on future computing platforms or software versions.”
  - Andrew Wilson, Significant Properties Report: inSPECT Work Package 2.2, 2007.

# Running to stand still...

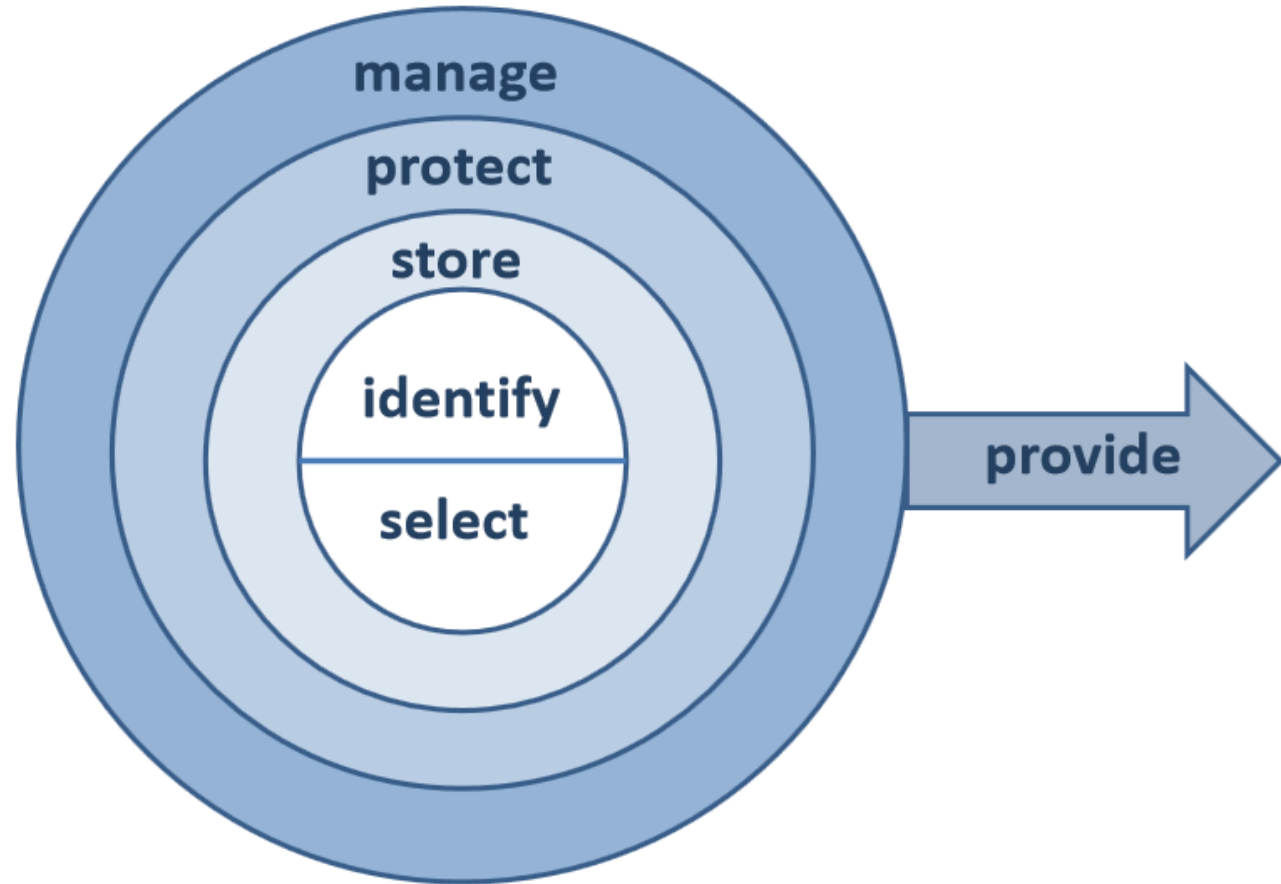

- “Traditionally, preserving things meant keeping them unchanged; however our digital environment has fundamentally changed our concept of preservation requirements. **If we hold on to digital information without modifications, accessing the information will become increasingly difficult, if not impossible**”
  - Su-Sing Chen, “The Paradox of Digital Preservation”, Computer, March 2001, 2-6

# What is digital preservation?

- “...a **formal endeavor** to ensure that digital information of continuing value remains accessible and usable.”
  - Digital Preservation Coalition
- “Digital preservation is the **active management** of digital content over time to ensure ongoing access. ”
  - Library of Congress

# Digital preservation consists of...

- Identification
- Selection
- Storing
- Protecting
- Managing
- Providing access

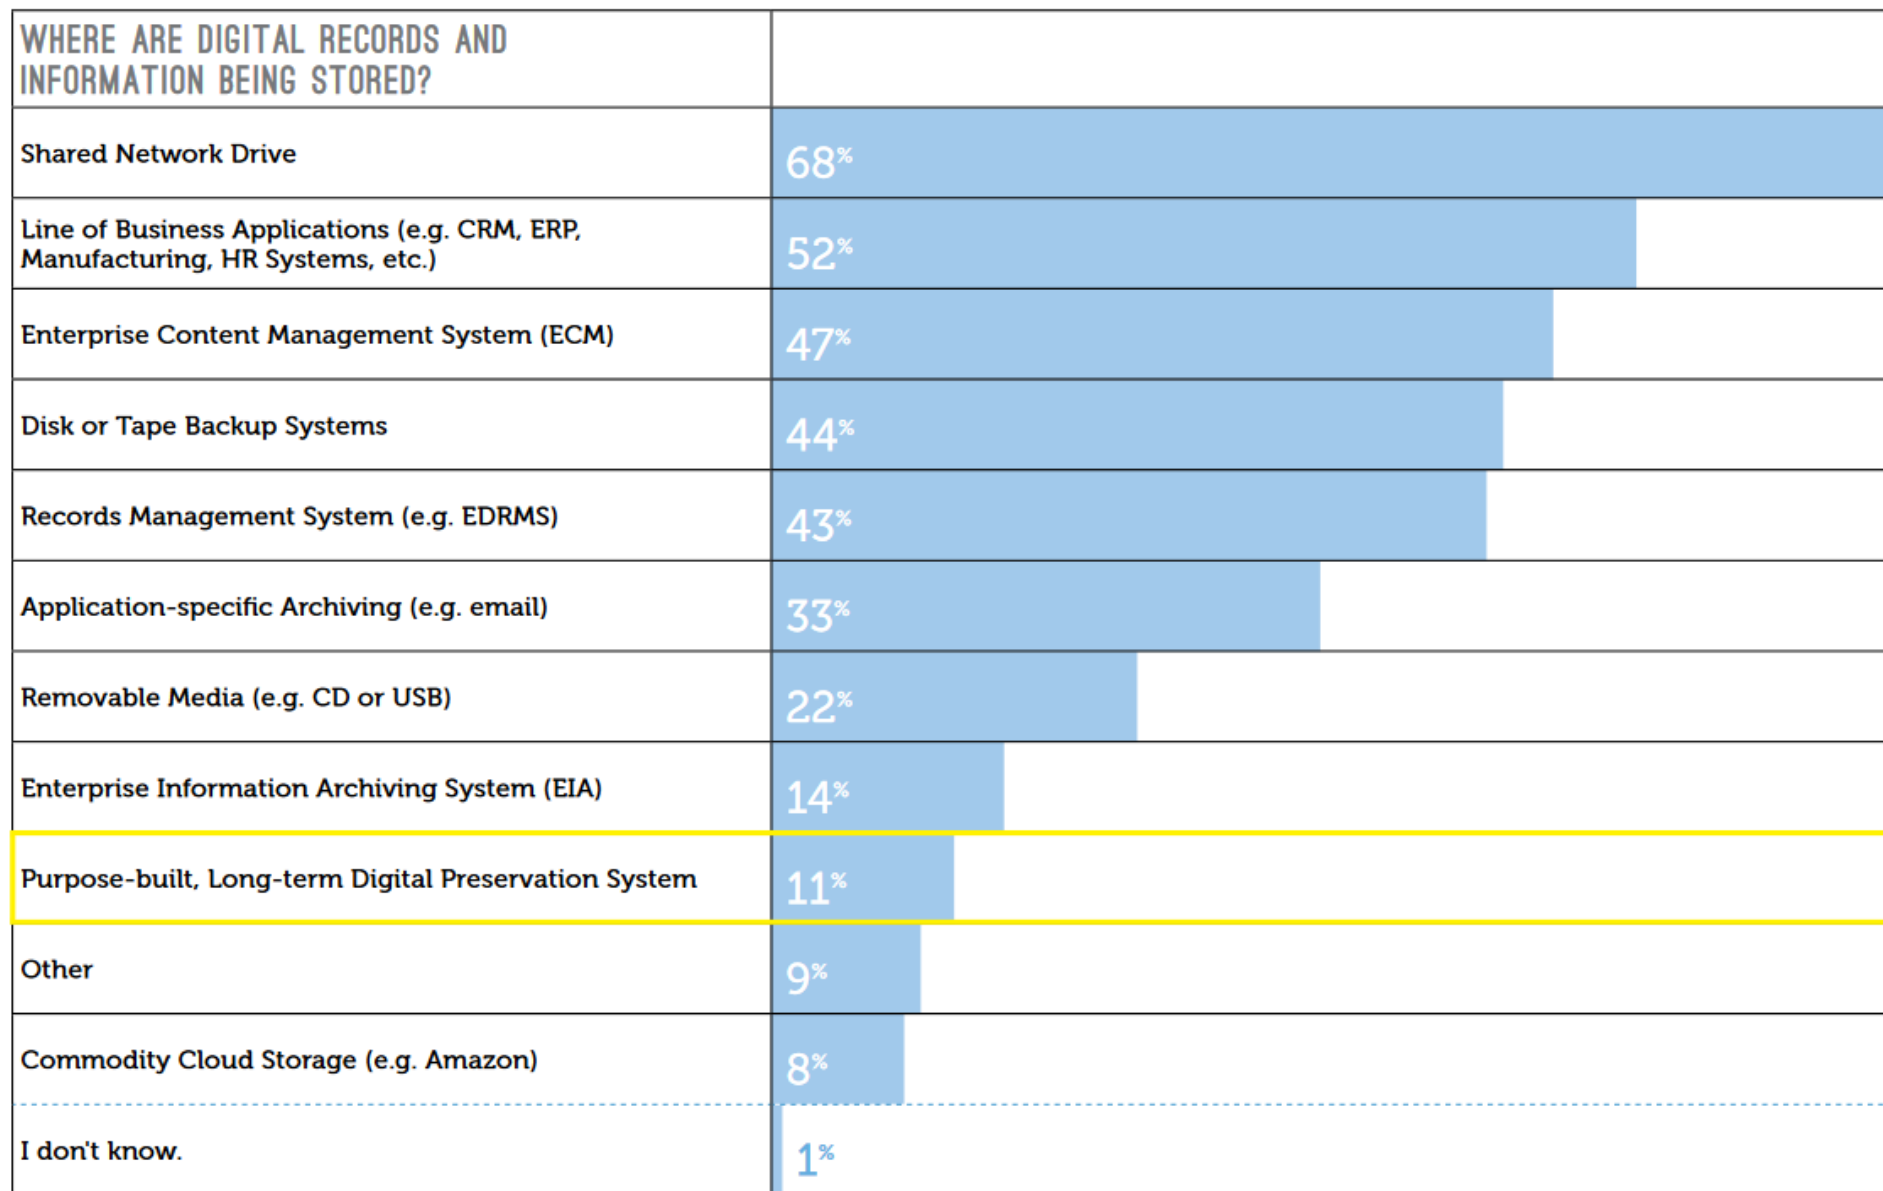

Chart from: The Governance of Long-Term Digital Information, IGI 2016 Benchmark. <http://preservica.com/wp-content/uploads/sites/3/2016/05/The-Governance-of-Long-Term-Digital-Information-IGI-Benchmark-2016.pdf>

- “Archivists, historians, and librarians—among many others—have been sounding the alarm about an impending ‘digital dark age’ and taking action to protect their digital information for decades.”
  - Barclay T. Blair, Executive Director and Founder, Information Governance Initiative

# COPPUL Digital Preservation Network

- Expertise and resources
- Educational and professional development opportunities
- Advocacy, both local, regional, and national
- Collaboration with external partners
- Align COPPUL's efforts with emerging national and international standards, services, and infrastructure
- Training, technical support, and advice in relation to platforms and services

# Today's tour will include...

- Web archiving
- Preservation processing services
- Preservation storage

# Web archiving

A case study in the use of Archive-It

# Why archive the web?

- “The web, as it appears at any one moment, is a phantasmagoria. It’s not a place in any reliable sense of the word. It is not a repository. It is not a library. It is a constantly changing patchwork of perpetual nowness. You can't count on the web, okay? It’s unstable. You have to know this. ”
  - [https://www.theatlantic.com/technology/archive/2015/10/raiders-of-the-lost-web/409210/?utm\\_source=twb](https://www.theatlantic.com/technology/archive/2015/10/raiders-of-the-lost-web/409210/?utm_source=twb)

# Ephemeral and drifting

- “Fifty percent of URLs in the UK Web Archive have lost or missing content after one year. **After ten years nearly all content is moved, changed, missing or gone.**”
  - <https://blogs.loc.gov/thesignal/2015/06/dodge-that-memory-hole-saving-digital-news/>
- “We find that **for over 75% of references the content has drifted away from what it was when referenced.** These results raise significant concerns regarding the long term integrity of the web-based scholarly record and call for the deployment of techniques to combat these problems.”
  - <http://journals.plos.org/plosone/article?id=10.1371/journal.pone.0167475>

# Archive-It

- A hosted service of the Internet Archive
- Consortial license across 40+ institutions in Western Canada and Ontario
- Uses open source crawling and playback software to capture and provide access to snapshots of the web
- Produces standards-based WARC files

# Corporate memory

How to use the Calendar

## The University of Victoria Calendar 2016-2017

Welcome to the University of Victoria's online Calendar. The Calendar is the official guide to all programs, services and regulations of the University. This online edition contains the same information as that published in the PDF versions.

**Important Information**

The official academic year begins on May 1. Changes in Calendar regulations take effect **May 1**, **September 1**, and **January 1** of each academic year unless otherwise approved by the Senate. Nevertheless, the University reserves the right to revise or cancel at any time any rule or regulation published in this Calendar or its supplements. The Calendar is published **three times per year**: in the spring (effective May 1), summer (effective September 1) and winter (effective January 1) by the Office of the Registrar, Student Affairs, under authority granted by the Senate of the University.

The University of Victoria operates under the authority of the University Act (RSBC 1996 c. 468) which provides for a Convocation, Board of Governors, Senate and Faculties. The University Act describes the powers and responsibilities of those bodies, as well as the duties of the officers of the University. Copies of this Act are held in the University Library.

**Bargaining updates**

Wednesday, September 17, 2014

**We have a tentative agreement!**

It took several days of intensive negotiation, but on Tuesday morning, we finally reached an agreement that:

**The Issues That Matter**

**Students at risk**  
BC needs smaller classes, extra help for students who need it

**The \$1,000 difference**  
BC's per-student funding is second-worst in the country

**A fair deal**  
So teachers can finally keep up with the cost of living

# Access to government information

- “...facilitate democracy by helping to ensure that citizens have the information required to participate meaningfully in the democratic process and that politicians and bureaucrats remain accountable to the citizenry.”
- Mr. Justice La Forest, Supreme Court of Canada, 1997.

# Web archiving issues for COPPUL institutions

- Repatriating and storing WARC files in Canada
- Jurisdictional issues
- Copyright and other legal issues
- **Policies, procedures, workflows**
  - Appraisal and selection
  - Quality assurance and metadata
  - Etc., etc.

# Libraries coming together...

- Expanding consortial license nationally
- Establishing a “Canadian Web Archiving Coalition” through CARL
- COPPUL looking to partner with Ontario Council of University Libraries (OCUL) for distributed archival storage of WARCs
- MOU with COPPUL institutions and U of Waterloo/U of Alberta to enable data-intensive analysis of Canadian web archives via Compute Canada infrastructure

# Other platforms...

- Repository built on Islandora, a Canadian-developed open-source platform currently in use at over 100 public and private institutions worldwide
- Partnership w/ British Columbia Electronic Library Network (BC ELN)

- Open source research data repository software
- IQSS at Harvard leads development
- Canadian Working Group established under CARL's Portage Network

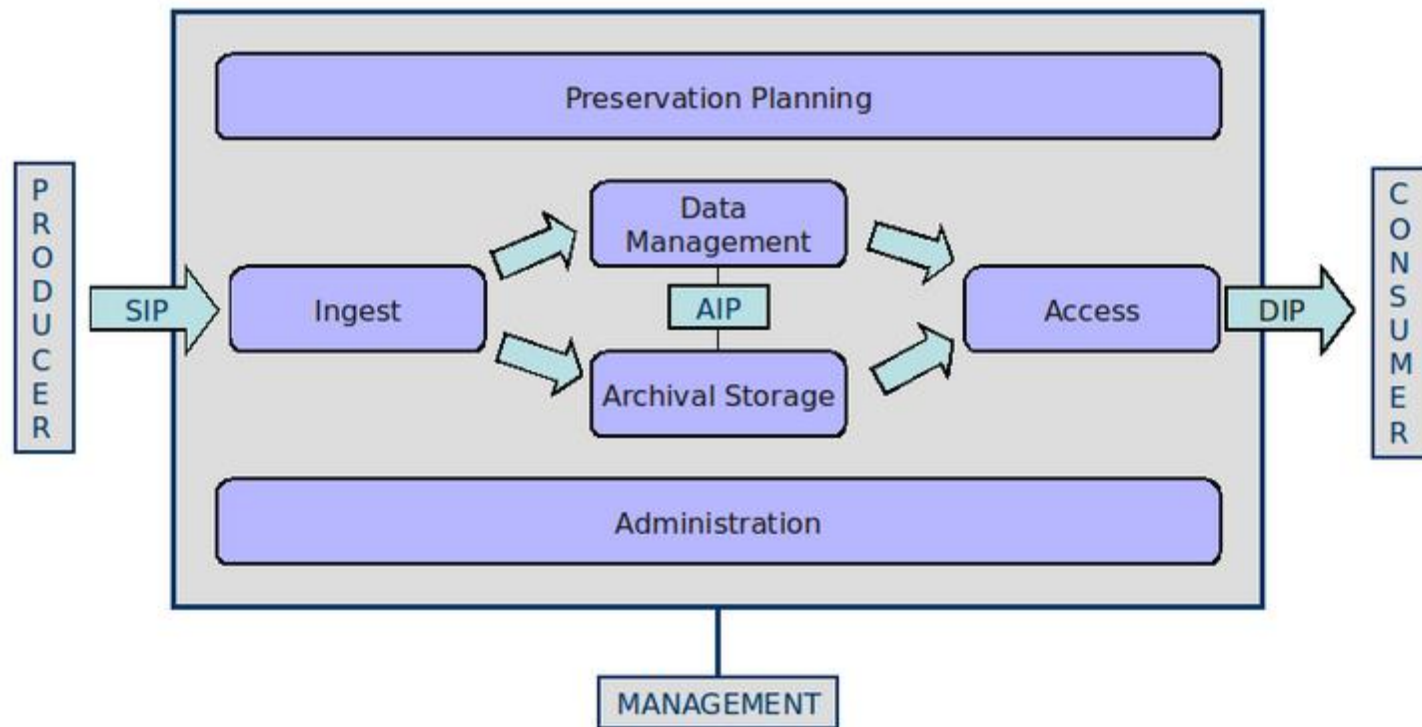

# Processing for preservation: Archivematica

Archivematica-as-a-service as a digital preservation platform

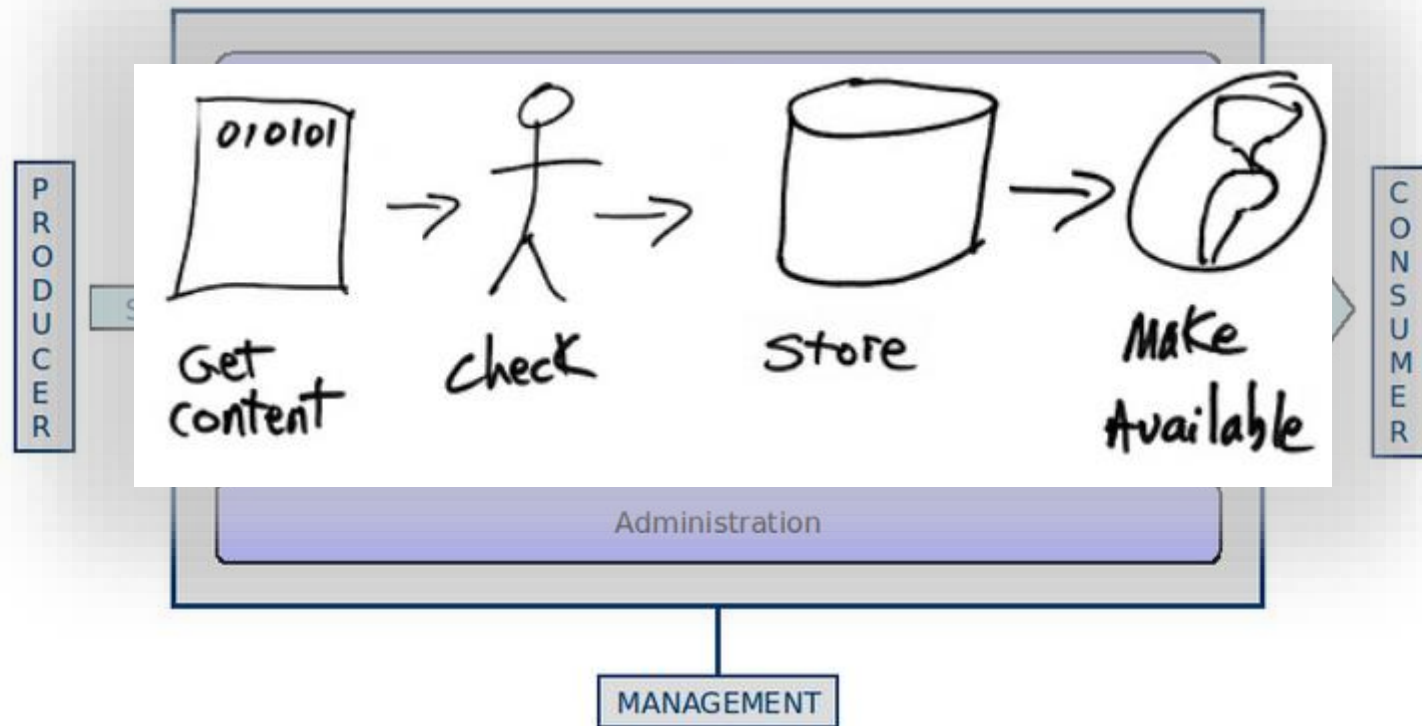

- “Archivematica provides an integrated suite of free and open-source tools that allows users to process digital objects from ingest to archival storage and access in compliance with the ISO-OAIS functional model and other digital preservation standards and best practices.”
  - <https://wiki.archivematica.org/Overview>

# Open Archival Information System (OAIS) reference model (ISO-STD 14721)

# Open Archival Information System (OAIS) reference model (ISO-STD 14721)

# Archivematica micro-services include

- Virus scans
- Checksums
- Format identification and validation
- Format normalization
- Creation of METS.xml files with PREMIS and other metadata
- Creation of Archival Information Packages (AIPs)

# Open Archival Information System (OAIS) reference model (ISO-STD 14721)

ue processing

# Archivematica-as-a-service

- COPPUL promotes the service, signs up new institutions and provided seed funding for the one-time set-up costs
- Artefactual Systems provides installation, ongoing technical support and user training
- UBC provides a fee-based server hosting and digital object storage and back-up service

# Preservation storage: LOCKSS

Lots of Copies Keeps Stuff Safe

# Preservation storage vs. standard IT storage

- Standard IT storage systems are generally designed for digital objects that are in **active use**, and generally include backup and other disaster recovery mechanisms
- Preservation storage tackles the **long-term viability** of digital objects and as a result addresses somewhat different but also overlapping risk scenarios

# Standard IT storage threat scenarios

- Fire, flood, power failures
- Operator error
- Malicious attack
- Media degradation
- Obsolescence of storage systems and technologies

# Preservation storage service threat scenarios

- Fire, flood, power failures
- Operator error
- Malicious attack
- Media degradation
- Obsolescence of storage systems and technologies
- **Organizational failure**
- **Economic failure**
- **Jurisdictional failure**

# Standard IT storage and preservation storage services are **complementary**

## **Standard IT storage**

- Designed for active use
- Robust disaster recovery
- Constantly refreshed media
- Crucial infrastructure to support digital preservation services

## **Preservation storage service**

- Often characterized by different threat scenarios and governance structures that encourage inter-institutional collaboration
- Long-term thinking (i.e. 25-100 years)

# Preservation storage service

- Stores standard AIPs w/ preservation-specific metadata
- **Independently** administered copies (no single point of failure)
- **Disperse content across several institutions or jurisdictions** to address large-scale political and/or economic threats and/or environmental threats
- Hardware diversity
- Polling and repair mechanisms to detect and fix “bit-rot”

# A preservation storage service

- Undertake **long-term planning** that explicitly looks beyond the life of a particular institution
- Have **governance mechanisms** to address both short-term and long-term threats, including financial sustainability and succession planning
- Look beyond a **single institution or technological platform**, and work with other preservation initiatives to align infrastructure

# What is LOCKSS?

- An open-source, library-led digital preservation system built on the principle that “lots of copies keep stuff safe”
- Through a LOCKSS distributed network, libraries cooperate with one other to ensure their preserved content remains authentic and authoritative over the long term

# What does a Private LOCKSS Network do?

- It **ingests** content and **preserves** it by continually comparing the content it has collected with the same content collected by other LOCKSS Boxes, and repairing any differences

# WestVault

- COPPUL's emerging next generation Private LOCKSS Network
- Will run LOCKSS software at 5-7 university data centres with scalable storage
- **Ingests** content and **preserves** it by continually comparing the content it has collected with the same content collected by other LOCKSS Boxes, and repairing any differences

# Putting it all together

Platforms + Processing + Storage

Digital objects  
on shared  
network drives

**@archivematica®**

# COPPUL Digital Preservation Network

- Its not just about the tools and services, its about helping members build the capacity to undertake digital preservation activities at their institutions, and helping them align their efforts with other nationally and internationally

# To summarize...

- “...[i]f we are not to tolerate gaps in society’s memory in the future, we must intervene in the present to secure the long-term availability of culturally significant digital materials.”
  - Lavoie, B. F. (2006). The costs of digital preservation. Digital Preservation, 106-132.

# Thanks!

- [corey@coppul.ca](mailto:corey@coppul.ca)
