

LIFELONG LEARNING, WHEREVER YOU GO

Mobile app lets students share their learning journey, wherever it takes them

LMS integration allows for immediate reflection on content

Brightspace ePortfolio is a cross-platform tool that combines digital portfolio functionality and social learning. It allows students to document and share their learning journey as it happens. Accessible on both web and mobile platforms, it allows learners to reflect on their course content, academic achievements, and learning experiences wherever they go.

KEY BENEFITS

Social learning. Brightspace ePortfolio creates an engaging, collaborative learning experience. Students can reflect on course content, assignments, media, and more. Peers, mentors, and instructors can comment on the content shared with them.

Showcase of achievements. Students can create web-based presentations for academic advisors, peers, or potential employers to demonstrate their academic achievements. After graduation, they can export their ePortfolio to take it with them in their lifelong learning journey.

On-the-go availability. Students can access their ePortfolio on both desktop and mobile devices. It allows them to reflect on their learning experiences on field trips, international exchanges, or wherever else they go.

#1 LMS
for next-gen online
teaching and learning

D2L is demonstrating a commitment to the higher education industry, and is considered a partner—not just a technology provider—by several of its customers.

- 2015 Ovum Report

ABOUT D2L

D2L is the software leader that makes the learning experience better. Our cloud-based platform—Brightspace—is easy, flexible, and smart. It helps educators personalize the experience for every learner to deliver real results. D2L is also a world leader in learning analytics: our platform predicts learner performance so that you can take action in real time to keep them on track. Brightspace is used by learners in higher education, K–12, and the enterprise sector.
