

Ricoh Canada IT Cyber Resilience

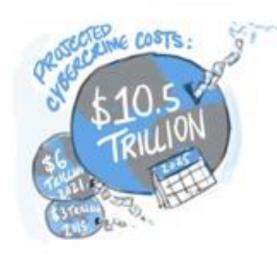

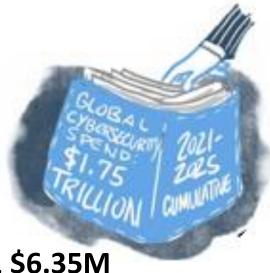

# CYBER SECURITY INDUSTRY: TRENDS & PREDICTIONS

Average Data Breach in Canada – 2021 \$6.35M

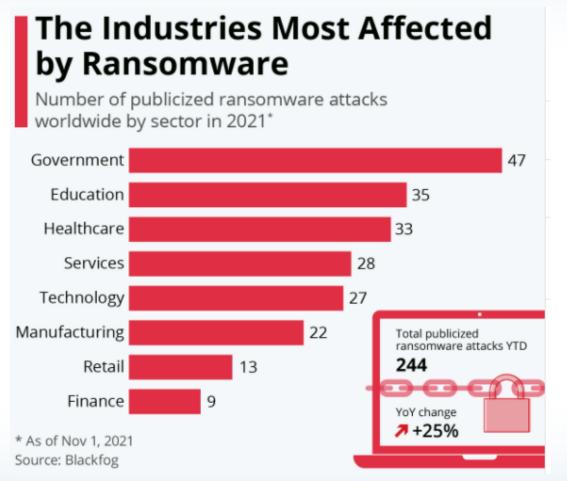

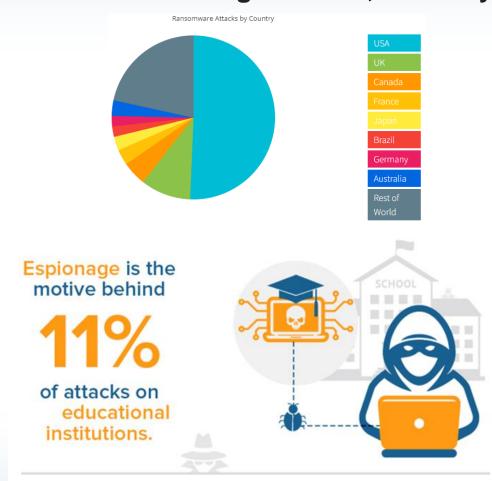

# CYBER SECURITY TRENDS: RANSOMWARE

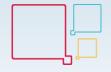

#### Ransomware attacks cost Canadian organizations an average of \$458,247 last year

Average cost to education institutions \$2.73 million to remediate the impact of a ransomware attack

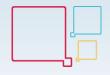

# CYBER RESILIENCY: MODEL & FRAMEWORK

#### The average days of downtime due to ransomware outbreaks in 2021 was 19 days

## CYBER RESILIENCY MITIGATION: ZERO TRUST PRINCIPLES

#### **Verify:**

Authenticate and verify— on an ongoing basis

#### **Give minimal access:**

Segment the network to create small zones of control Control access to applications, data, resources Grant least privilege access based on need or role

#### **Assume Breach:**

Plan as if attackers are inside and outside the network Forget the concept of a "trusted zone", e.g., 'in the office'

# CYBER RESILIENCY MITIGATION: ZERO TRUST ACCESS

Knowing and Controlling Everyone and Everything on and off the Network

Ensures consistent security policy across the network, the cloud, and off-network

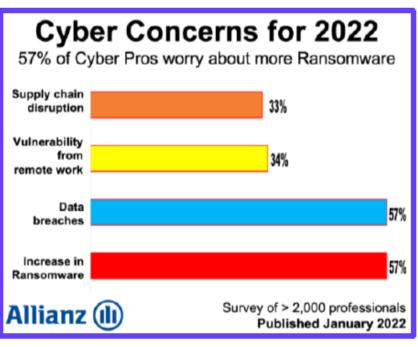

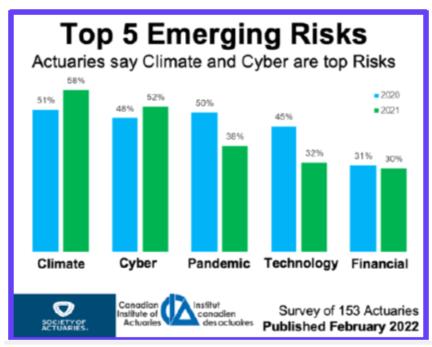

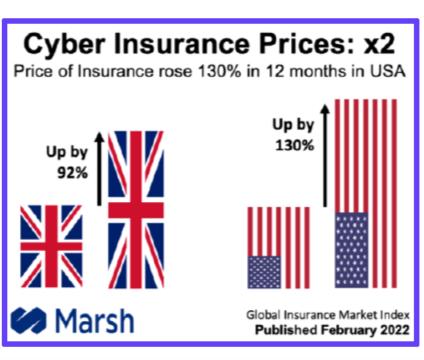

## CYBER SECURITY MITIGATION: CYBER INSURANCE TRENDS

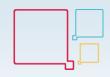

Increase in Demand
Tighter Terms and Exclusions
Rising Premiums
Lower Coverage Limits
Increase in Self-Insured Retention Levels

# CYBER RESILIENCY MITIGATION: TOP 10 TIPS

- 1. Inventory all systems in your environment
- 2. Make patching systems in a regular and timely fashion a priority
- 3. Externally scan the environment
- 4. Train Faculty and Students how to identify phishing emails
- 5. Follow the principles of least privilege and zero trust access
- 6. Practice good password hygiene
- 7. Update antivirus on endpoints and servers and set them to automatically conduct scans
- 8. Properly segment the network
- 9. Ensure critical systems and files have up-to-date backups
- 10. Have an Incident Response Plan and Process that is up-to-date and tested in place

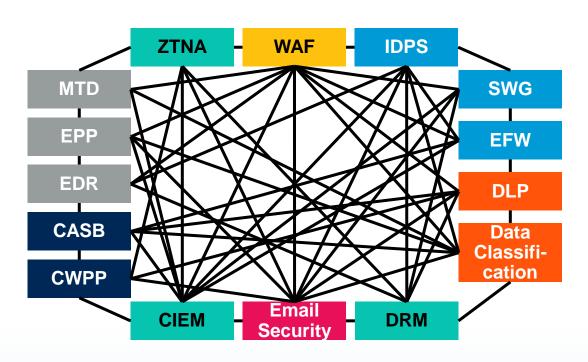

# GARTNER CYBERSECURITY: MESH ARCHITECTURE

# Gartner

Executive Guide to Cybersecurity Mesh, 2022

Felix Gaehtgens, James Hoover, Henrique Teixeira, Claudio Neiva, Michael Kelley, Mary Ruddy, Patrick Hevesi. As of October 2021

This graphic was published by Gartner, Inc. as part of a larger research document and should be evaluated in the context of the entire document. The Gartner document is available upon request from Fortinet.
